

Protect local forests with your climate contribution

Together, we can transform endangered monocultures into climate-resistant and biodiverse forests.

Climate change is affecting us all. In the case of forests, **monocultures** are particularly vulnerable to the adverse effects of climate change, such as storms, droughts and pests.

>60% of forests at climate risk in Europe¹

In Germany alone, there are more than **3 million hectares of monocultures** that need to be turned into biodiverse mixed forests. This is about the size of North Rhine-Westphalia. Mixed forests are **more resilient to climate change** and **store additional CO₂** - among many other co-benefits.

Your investment in local climate action pays off

- Position yourself as a climate leader to investors and customers
- Showcase high-quality and traceable impact
- Retain and attract employees

Claudia Frehse
CEO

*The climate crisis is one of the **greatest challenges of our time.** In my view, the **IT industry must play a key role** in climate protection.*

TUVNORD

Climate Action Reinvented by Pina Earth

Digital innovation for accurate CO₂-quantification

We turn endangered monocultures into climate-resilient, biodiverse forests - a process called **'forest adaptation'**. The projects activities are the following:

- Planting diverse tree species
- Assisted natural succession / rejuvenation
- Wildlife management

Next to the additional sequestration of carbon, the projects contribute to a number of **UN SDGs**.

High-quality carbon credits

- Technological approach using a **digital twin** of the forest and **scientific climate models**
- Pina Earth's projects are developed under the **ISO Norm 14064-2** and **audited by TÜV NORD**
- Conservative **risk buffer & dynamic CO₂ baseline**

Our Services

- **Media kit for Marketing**
- **Official Documentation**
- **Project Site Visits**

High-quality photos & ready-to-use descriptions
 Retirement certificate with traceable ID & audit reports
 Guided visit with your customers, colleagues & leadership

Why Pina Earth?

Market Leader in Germany

Established developer of forest carbon projects in Germany, with a track record of certified projects

In-house Expertise

Our team of experts includes engineers, data analysts, forest and carbon market experts

Scientific Background

Founded at the Technical University of Munich, operating science-based until today
